YOUR BUSINESS. OUR TECHNOLOGY.

Engineering High-Performance Digital Systems & Software

YUKT IT SOLUTIONS builds bespoke web architectures, custom enterprise software platforms, and autonomous AI-driven workflows that eliminate operational bottlenecks and accelerate business growth.

VERIFIED ENGINEERING PRACTICE

End-to-End Digital Transformation Pod

From high-concurrency corporate web portals and custom CRM/ERP backends to autonomous WhatsApp bots and AI integrations, we deliver 100% intellectual property ownership with senior architectural oversight.

ABOUT THE STUDIO

Bridging Technical Excellence & Measurable Business Velocity

YUKT IT SOLUTIONS is an Indian engineering studio dedicated to building resilient software systems, high-converting digital web experiences, and autonomous AI pipelines. We replace bloated enterprise overhead with direct senior architecture, rapid milestone execution, and zero vendor lock-in.

ENGINEERING LEADERSHIP POD • DIRECT HANDS-ON ARCHITECTS

AS

Ansar Ali Shah

Founder & Lead Technical Architect

High-Performance Web Backends, High-Concurrency Architectures, Microservices & Systems Infrastructure.

Direct Desk: +91 95763 38282 • ansar@yukt.online

RM

Ranjeet

Co-Founder & Lead Solutions Architect

Cloud Systems, Scalable Full-Stack Engineering, Enterprise SaaS Infrastructure & AI Integration.

Direct Desk: +91 72176 45059 • ranjeet@yukt.online

THE 4 VERIFIED ENGINEERING COMMITMENTS

100% IP & Code Transfer

Complete source code, Git repositories, Figma design systems, and database schemas are handed over with full intellectual property rights upon milestone sign-off.

Bi-Weekly Agile Sprints

Continuous visibility via live staging environments, automated CI/CD deployments, and transparent sprint reviews directly with your leadership team.

Strict NDA & Data Security

Ironclad mutual non-disclosure agreements, encrypted communications, and enterprise security protocols protect your proprietary business logic and client records.

Direct Senior Architecture

Every software system and database schema is architected and code-reviewed directly by senior full-stack specialists, avoiding junior hand-offs or third-party dilution.

STAGE 01
Scoping & Blueprint
Comprehensive system mapping, database entity design, and milestone timelines.

STAGE 02
Agile Git Sprints
Bi-weekly functional deployments on staging with transparent stakeholder demos.

STAGE 03
Automated QA & Audit
Rigorous unit/integration test suites, OWASP vulnerability scans, and load testing.

STAGE 04
Production Handover
100% IP code transfer, CI/CD pipeline automation, and ongoing maintenance SLA.

ENGINEERING SPECIALIZATION

High-Performance Web Design & Custom Development

We engineer bespoke corporate websites, single-page web applications, high-converting lead funnels, and scalable portals that achieve sub-second load times, flawless responsiveness, and robust security.

Corporate Portals & Web Apps

Custom web portals and multi-page corporate sites built with React, Next.js, and Laravel. Structured for enterprise credibility, fast navigation, and seamless content administration.

- Next.js & React Single-Page / SSR Apps
- Enterprise Portal & Client Intranets

High-Speed CMS & WordPress

Custom WordPress theme architectures and headless CMS deployments built without bloated third-party page builders. Lightweight, easily editable, and hardened against vulnerabilities.

- Clean Gutenberg & Headless WordPress
- Role-based custom admin panels

High-Converting Landing Pages

Campaign landing pages and sales funnels engineered for maximum conversion rates. Includes integrated WhatsApp click-to-chat triggers, CRM lead hooks, and GA4 event tracking.

- Direct WhatsApp lead capture funnels
- Sub-second mobile loading speeds

Website Redesign & Maintenance

Modernization of legacy websites into fast, responsive digital assets. Ongoing technical maintenance SLAs, uptime monitoring, security patching, and core updates.

- Legacy code refactoring & speed audits
- 24/7 uptime & vulnerability monitoring

Sub-Second Loading

First Contentful Paint under 0.8s with optimized server caching.

Core Web Vitals >95

Zero layout shifts, instant touch responsiveness on mobile.

SEO Semantic Graph

Schema.org structured entities, OpenGraph, and XML sitemaps.

Clean Git Codebase

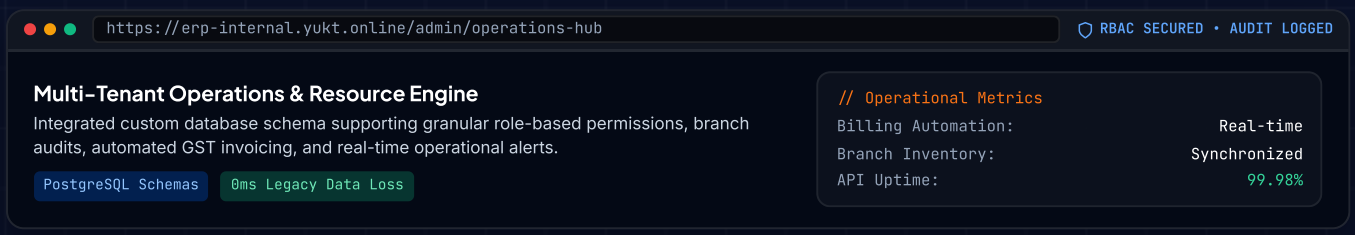

Modular, documented code with zero proprietary lock-in.

VERIFIED STACKS: React | Next.js | Laravel | PHP | WordPress | Tailwind CSS | Node.js | MySQL

ENTERPRISE SYSTEMS

Mission-Critical Custom Software & Business Platforms

Replace expensive, recurring third-party SaaS subscriptions with bespoke software assets built specifically for your internal workflow, business logic, and operational scale.

Custom CRM & Lead Pipelines

Tailored lead scoring, client conversation tracking, automated task allocation, and WhatsApp notification hooks designed strictly around your sales cycle.

- Multi-stage deal flow pipelines
- Automated WhatsApp & Email triggers

Enterprise ERP & Billing Systems

End-to-end resource planning, inventory control, GST invoicing, order management, and automated accounting sync without recurring per-seat software fees.

- Multi-branch inventory reconciliation
- GST compliant invoicing & PDF generation

Multi-Tenant SaaS Architectures

Scalable cloud software platforms with isolated tenant databases, subscription billing engines, Stripe/Razorpay integration, and automated provisioning.

- Automated recurring subscription billing
- Docker & AWS auto-scaling architecture

Fleet & Logistics Tracking

Real-time shipment visibility, delivery dispatch consoles, courier API webhooks (Shiprocket, Delhivery), and operational tracking portals.

- Real-time milestone dispatch tracking
- Custom mobile apps for delivery agents

Granular RBAC
Role-based access permissions with full audit trail logging.

REST & GraphQL APIs
Microservice specifications with full Swagger/Postman docs.

Zero Data Loss
Zero-downtime legacy schema migration and normalization.

CI/CD & Docker
Automated container deployment on AWS cloud infrastructure.

SOFTWARE STACK: Laravel | Python | Node.js | PostgreSQL | MySQL | Docker | AWS | Flutter

NEXT-GEN INTELLIGENCE

Autonomous AI Agents, LLM Integrations & Automation

Leverage tailored Artificial Intelligence to eliminate repetitive human tasks. We engineer official WhatsApp Business bots, proprietary RAG knowledge assistants, automated document processing, and real-time voice agents.

INTELLIGENT ENTERPRISE WORKFLOW ARCHITECTURE

Zero Hallucinations • Grounded Knowledge Base

01. INGESTION
Multi-Channel Input
WhatsApp messages, audio voicemails, uploaded PDFs, invoices, or web inquiries.

02. REASONING
RAG & Vector Index
Queries semantic knowledge base (pgvector) to fetch verified business rules.

03. AGENT EXECUTION
Autonomous Action
LLM evaluates intent, extracts structured JSON, and triggers business API actions.

04. RESOLUTION
Sync & Response
Instant customer reply via WhatsApp, CRM lead updated, and team notified.

WhatsApp Business API Automation

Meta-approved WhatsApp Business bots with interactive buttons, live catalog browsing, automated FAQ responses, and direct routing to human representatives.

- Official Meta Cloud API webhook setups
- Automated lead qualification & booking

RAG Internal Knowledge Assistants

Private company search engines and chatbots trained strictly on your internal PDF manuals, contracts, SOPs, and product specifications without external data leakage.

- Strictly grounded answers with source citations
- Vector database search (Pinecone & pgvector)

OCR Document & Invoice Processing

Automated extraction of vendor bills, receipts, purchase orders, and government identity cards with high optical accuracy into your ERP database.

- Up to 80% reduction in manual data entry
- Validation rules & fraud anomaly detection

Conversational Voice AI Assistants

Real-time voice bots capable of inbound support, appointment scheduling, and automated outbound customer satisfaction follow-ups with natural speech synthesis.

- Natural multi-turn telephone dialogs
- Telephony SIP trunk & CRM synchronization

Zero Hallucinations
Grounded strictly on approved company knowledge vectors.

100% Data Privacy
Enterprise tenant isolation; zero public LLM training.

Human Fallback
Automated escalation triggers for high-value sales leads.

Custom API Webhooks
Zapier, Make, and native REST API bi-directional synchronization.

AI STACK: `OpenAI API` `Claude 3.5` `LangChain` `LlamaIndex` `Python` `FastAPI` `pgvector` `Pinecone`

GROWTH & BRAND STUDIO

Data-Driven Performance Marketing & Brand Identity

Capture market authority through targeted advertising campaigns, Answer Engine Optimization (AEO), and human-centric visual design that turns prospects into committed customers.

Digital Marketing & Acquisition

Targeted Meta & YouTube Ads

High-intent video and carousel ad creative testing across Meta (Facebook & Instagram) and YouTube to maximize qualified inbound inquiries.

- Multi-variant ad creative & copy testing
- Direct WhatsApp lead generation funnels

LinkedIn B2B Account-Based Marketing

Precision account targeting connecting your technical offerings directly with CTOs, Operations Heads, and C-level decision-makers.

- Account-Based Marketing (ABM) pipelines
- Automated nurture sequencing & lead scoring

AEO (Answer Engine Optimization) & SEO

Technical schema markup and entity authority positioning so your company surfaces in modern AI search results like ChatGPT, Perplexity, and Gemini.

- Structured Knowledge Graph & Schema.org
- GA4 & Meta Server-Side Conversions API (CAPI)

Branding, UI/UX & Media Design

Distinctive Logo & Identity Suites

Crafting memorable vector emblems, brand guidelines, typography standards, and color palettes that instill immediate enterprise confidence.

- Full vector suites (SVG, AI, EPS, high-res PNG)
- Comprehensive Brand Stylebook manual

Interactive UI/UX Design in Figma

User-friendly interface design, design tokens, and clickable interactive prototypes for web and mobile platforms before a single line of code is written.

- Complete component libraries & tokens
- Mobile-first user journey mapping

Brochures, Pitch Decks & Video Editing

High-resolution client brochures, investor pitch decks, social media asset kits, and 4K promotional video editing and motion graphics.

- Print-ready PDF brochures & slide decks
- Video editing, color grading & audio mastering

High-Intent Ads
Targeted Meta, YouTube, and LinkedIn B2B acquisition.

Answer Engine (AEO)
Surface in conversational AI search engines (ChatGPT/Perplexity).

Figma UI/UX Systems
Component-driven design libraries and clickable prototypes.

Server-Side GA4
Zero tracking loss with Meta Conversions API (CAPI).

CREATIVE & ADS STACK: `Figma` `Adobe Suite` `Google Ads` `Meta Ads` `LinkedIn ABM` `GA4 & CAPI` `DaVinci Resolve`

SPECIALIZED SOLUTIONS

E-Commerce Storefronts, Dedicated Pods & The YUKT Edge

Whether you need a high-velocity retail shopping experience, dedicated senior developer pods for team augmentation, or rapid MVP engineering, we deliver proven execution.

High-Conversion E-Commerce

SHOPIFY • WOOCOMMERCE

Custom online storefronts engineered for Indian & international retail with frictionless checkout and payment rails.

- Shopify Plus & WooCommerce theme engineering
- Razorpay, Cashfree & 1-Click UPI checkout

Cross-Platform Mobile Apps

IOS • ANDROID

Native-feel mobile apps built with React Native and Flutter with real-time sync, push notifications, and payment gateways.

- Single codebase for iOS & Android devices
- Apple App Store & Google Play Store compliance

Dedicated Pods & MVP Launch

STARTUPS • SCALEUPS

Rapid Minimum Viable Product engineering and dedicated developer pods for businesses needing immediate technical scale.

- Rapid 4 to 8 week production MVP delivery
- Full-stack developers with direct Git access

Cloud DevOps & Infrastructure

AWS • DOCKER • CI/CD

Scalable cloud architecture, automated deployment pipelines, security hardening, and ongoing 24/7 server monitoring.

- Automated Docker containerization & CI/CD
- SSL, WAF protection & automated daily backups

Why Forward-Thinking Businesses Partner With YUKT

THE YUKT ENGINEERING ADVANTAGE

01. Direct Senior Access

You work directly with lead architects Ansar and Ranjeet. No junior developers learning on your project or account managers filtering communications.

02. Zero Vendor Lock-in

You own 100% of your source code, repositories, schemas, and credentials from day one. You are never held hostage by proprietary licensing.

03. Transparent Sprints

Bi-weekly staging deployments ensure you test working software every 14 days rather than waiting months to discover architectural misalignments.

04. WhatsApp Collaboration

Dedicated direct WhatsApp channels for real-time problem solving, sprint status alerts, and instantaneous technical support when you need it.

05. Speed & Hardened Security

Sub-second page speeds, OWASP-aligned database queries, strict mutual NDAs, and automated unit testing ensure rock-solid production stability.

06. Dual Delivery Hubs

Strategic presence in Sector 62, Noida (NCR) and HSR Layout, Bengaluru, combining northern business acumen with southern engineering depth.

SPECIALIZED ECOSYSTEM: Shopify Plus | WooCommerce | Flutter | React Native | AWS Cloud | Docker | Razorpay | Shiprocket API

ENGINEERING DESKS OPEN FOR NEW SCOPES

Let's Build Something Extraordinary Together.

YOUR BUSINESS. OUR TECHNOLOGY.

Whether you are launching a custom web platform, modernizing mission-critical enterprise software, or integrating autonomous AI workflows, our senior architects are ready to review your requirements and deliver a scoped blueprint.

STEP 01
Discovery Call & Scope
Direct technical discussion to map project scope, user journeys, and technical dependencies.

STEP 02
Architecture Blueprint
Receive a transparent milestone quote, schema design, and sprint delivery schedule.

STEP 03
Sprint 1 Execution
Immediate Git setup, live staging environment, and transparent bi-weekly progress.
